Projects

Portfolio

A React-based personal portfolio website showcasing skills, projects, and professional background. Developed using React, Material-UI, and Context API for reusable components, visually appealing design, and efficient data management.

Link: <https://mohammadghorbani-dev.github.io/Portfolio>

Contacts Manager

An efficient React app for managing contacts. It utilizes Axios, Material-UI, Tailwind CSS, Context API, and React Router DOM for seamless contact management and navigation.

Link: <https://contact-manager.iran.liara.run/>

Messaging App

A React-based messaging app with RESTful API integration. Features include message send/receive, contact editing, and message deletion. Built using React, Tailwind CSS, and RESTful API framework for efficient communication.
